

step 1: Fold the square into 3 equal sections, so that the side flaps overlap equally.

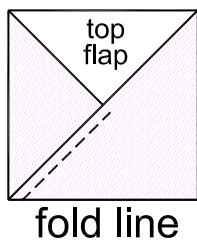

step 2: stitch through all layers of fabric, only where the two side flaps overlap. This will create the pockets.

step 3: fold it in half so that the top and bottom flap are together and stitch up the sides*. Note: the bottom flap is now a top flap too.

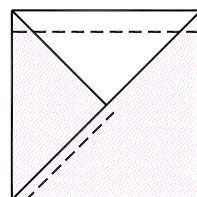

stitch up the sides

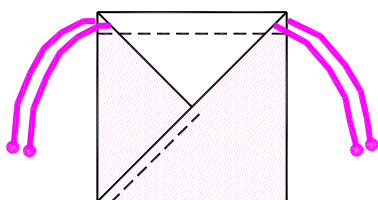

*I stitched as close to the side as possible, since I don't have to worry about raveling

step 4: turn the bag inside out and fold down the top flaps.

step 5: stitch about 1/2" from the top over the top flaps as if you were sewing a sleeve.

step 6: string cord through the sides. Note: in step three if you fold it the other way and sew it up, the pockets will be on the inside.
